

WSC ADVISORY #2016-012
NEW PHELAN MC-DERMIID FIELD IN THE ACLM3 SCREEN

ACTION REQUIRED

EFFECTIVE DATE: IMMEDIATELY

The Florida Legislature passed laws that allow the Agency for Persons with Disabilities to serve individuals with Phelan-McDermid syndrome through the iBudget Waiver effective July 1, 2016. "Phelan-McDermid syndrome" means a disorder caused by the loss of the terminal segment of the long arm of chromosome 22, which occurs near the end of the chromosome at a location designated q13.3, typically leading to a developmental delay, intellectual disability, dolicocephaly, hypotonia, or absent or delayed speech.

The ABC system (ACLM3 screen) has been updated to add a new field for Phelan-McDermid with a code 11. WSC's should ensure that this code is used for individuals with a confirmed diagnosis of Phelan-McDermid when updating the ABC system. After eligibility is established, the following will be needed prior to waiver enrollment: QSI, EZ iBudget Calculator, verification of level of care criteria of wavier enrollment as indicated in the completed Waiver Eligibility Worksheet and correct Medicaid type. Once these steps are complete, the WSC must work with the Region and follow current waiver enrollment procedures.
